

Lorain County Community College's academic programs are designed to challenge you, prepare you for your future, and position you for success. LCCC offers unequalled learning opportunities. Whether you want a short-term training program or a formal associate's degree program for immediate employment possibilities, to earn credits to transfer into an LCCC University Partnership bachelor's degree program or to earn credits to transfer into a bachelor's program at the college or university of your choice, LCCC can provide you with endless educational opportunities.

LCCC has formed a unique partnership with some of Ohio's finest universities to create the University Partnership at LCCC. The University Partnership offers you advanced-degree opportunities right on the LCCC campus. Select Ohio colleges and universities come to the LCCC campus to offer the curriculum for bachelor's and master's degree programs. The advanced-degree curriculum parallel programs that LCCC offers, meaning students in most associate's degree programs at LCCC will find a corresponding advanced-degree program through the University Partnership—which means that all LCCC graduates are able to further educational attainment to the baccalaureate level or higher.

Certificate
 Health Care Management

About LCCC Academic Programs and Services

Certificate Programs

A LCCC certificate program comprises a series of courses that form a coherent body of study in a specific discipline. Students who successfully complete the series of courses earn a certificate, which is an academic credential endorsed by the college.

Associate Degree Programs (Career and Technical)

Associate degree programs in career and technical fields are for those who want to complete a two-year program of study and be ready — and qualified — to work upon completion of the program.

Associate Degree (Transfer)

Associate degree programs in transfer areas are for those who aspire to earn bachelor's degrees (or higher) and who want to earn the first two or more years of the degree at LCCC. The portion of the program completed at LCCC transfers directly into the bachelor's degree program at the public college or university of the student's choice.

Bachelor's and Master's Degrees

Through the University Partnership at LCCC, bachelor's and master's degrees are offered for those who have earned associate's (or the equivalent coursework). The coursework for these programs is offered by partner universities and the degrees are granted by the same universities. Some programs allow up to three years of LCCC coursework — saving students even more tuition costs.

LCCC Student Support Services

LCCC supports its students in their education in all ways possible. Among services available to students are:

- Enrollment Services
 - Admissions
 - Academic Advising
 - Counseling
 - Registration
- Financial Aid and Scholarships
- Academic Support Center
 - Free Tutoring
 - Study Groups
- Library
- Academic Foundations
 - Strengthens math, English and study skills
- Employment and Career Services
 - Career Advising
 - Co-op and Work Based Learning
 - Interviewing Skills
 - Job-search Assistance
 - Resume Preparation
- Child Care
 - Children's Learning Center
- Women's Link
 - Support and Referral Service
- Office for Special Needs Services
- Veteran's Services
- Student Life
 - Leadership skills
 - Social activities
 - Creative Learning experiences

About Lorain County Community College

Lorain County Community College continues to experience record enrollment growth because attending LCCC is the most economical way to reach educational goals that help graduates become valuable players in the future economic growth of the county and region. Because of the variety and quality of learning opportunities LCCC provides, enrollment has doubled in the last ten years.

Lorain County Community College, which opened in 1963, is one of Ohio's leading colleges delivering credit programs at its Elyria campus and learning centers in downtown Elyria, Lorain, Wellington and Brunswick. Plus more than 300 courses are offered via distance-learning education options, and the Associate of Arts degree can be completed entirely online.

Students can choose from more than 100 educational programs. Students can complete the first half — and often more — of a bachelor's degree through LCCC's University Partnership, which brings eight universities to the LCCC campus offering 40 bachelor's and master's degree programs. Students can upgrade, retrain and improve current life skills.

In addition to providing a great education for those who enter college with aspirations of a degree, LCCC helps those who have changed their career goals, who want to broaden their horizons, and who want to return to work. LCCC provides learning and training for those who want to move up but find they need new or improved skills for the kind of professional opportunities they seek.

LCCC faculty is recognized locally and nationally for their work as professors, writers, researchers and in other areas. They all have advanced degrees and real world experience and understand their primary responsibility at LCCC is to teach classes.

LCCC is fully accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools, which is the regional accrediting authority for Ohio colleges and universities. Since opening its doors, LCCC has served more than 300,000 people. More than six million students enroll annually in credit courses at America's community colleges, representing about 46 percent of all students in higher education and about 56 percent of all first-time college entrants.
